I have been interested in technology for a long time and in the last years of my studies, I have even provided technical support to the school administration a few times. I think my strengths are curiosity, analytical thinking, identifying problems and thinking about options to solve them, so a few months ago I decided to learn programming and use my skills in this field.

## Skills

---

- HTML
- CSS/SCSS (Responsive Design)
- Bootstrap
- Javascript (ES6)
- Basics of ReactJS

## Other Technologies/Tools

- Figma
- Git (Github)
- Git Bash/Terminal
- GNU/Linux (I use Ubuntu Desktop on a daily basis)

## Experience

---

Some of my personal projects:

- [Personal Portfolio](#) (HTML, SCSS)
- [Space Tourism Website](#) ((React - {React Router, useLocation hook}, SCSS) - The first project I created using React)
- [Virtual Keyboard](#) (HTML, CSS, JS, {localStorage, HTML DOM} - Web API)
- [Simple Covid-19 Tracker](#) (HTML, SCSS, JS {Fetch, IP Geolocation, Covid cases} - API)

## Education

---

- Georgian Technical University - Bachelor's degree, Information Technology (2019-2023)
- FreeCodeCamp:
  - Responsive Web Design
  - JS Algorithms & Data Structures
  - Front-End Development Libraries

## Languages

---

- English (Intermediate)
- Georgian (Native)
